Messiah College
Campus Flooding
Policy and Procedure

Policy: It is the policy of Messiah College to manage issues that are related to flooding in a responsive proactive way to minimize damage and provide a safe environment for students, staff and visitors.

Objectives: To manage campus safety as it relates to issues around flooding.

Definitions:
Flash Flood – A sudden and destructive rush of water down a narrow gully or over a sloping surface caused by heavy rainfall.

Flood Warning/Flood Watch – In the US, the National Weather Service issues Flood Watches and Warnings for large-scale, gradual river flooding. Watches are issued when flooding is possible or expected within 12-48 hours. Warnings are issued when flooding over a large area or river flooding is imminent or occurring. Both can be issued on a county by county basis or for specific rivers or points along a river. When rapid flooding from heavy rain or a dam failure is expected, Flash Flood Watches and Warnings are issued.

Procedure: If a Flash Flood Warning, Flash Flood Watch, Flood Watch or Flood Warning is issued the following actions should be taken:

Responsibility:
Facility Services:

Step | Action –
--- | ---
1. | Inspect all water inlets on campus and remove any debris (or snow or ice) that could cause a blockage.
2. | Move several of the service vehicles from the Lenhart parking lot up to the Main Campus Visitor parking lot.
3. | Turn off the circuit breaker for the bollard lights that are located along the Yellow Breeches on the Fit Trail.
4. Inspect buildings in low laying areas for any water diversion that may be necessary.

5. Assist in any water cleanup that may be necessary during and after a flooding event. Care should be taken in such clean-up as water may be contaminated with sewer, etc. Proper PPE should be worn, which may include rubber boots, gloves, etc. depending on depth of water.

6. Any area that has been flooded is to be cleaned and treated with a microbiological cleaner (Fast Attack) to prevent mold growth. After initial cleanup dehumidifiers are to be placed in any inside area that has flooded.

7. The evacuation/relocation of students in areas that have been flooded will be decided by the College Crisis team.

8. The decision to evacuate buildings will be the responsibility of the VP for Operations, with consultation with the crisis team.

9. If outside contractor help is needed, one of the following companies should be called:

   Assistance with cleanup: Servpro: 717-770-2030. After hours emergencies: 484-824-2044

   Assistance with cleanup: Commonwealth Corporation: 717-770-2000. After hours ask for their on-call person. Also call Edsel: 717-554-5930 (cell) and Suzanne: 717-554-5929

   Assistance with emergency excavation or water diversion: CoyneX Evacuation 24 hours: 717-554-0741 or BR Kreider: 717-898-7651

Safety:

1. Ensure that all building occupants in the Mill House have vacated the property. Place a notice on the door that no one should enter until the
emergency is over.

2. If road closures are necessary, place cones or other road barricades at the affected areas. This is to be completed without approval from anyone, however, communication to the Vice President for Operations is needed.

3. Place barricades at the Swinging Bridge, the south entrance of the Fit Trail (at the Covered Bridge) and at the Fit Trail entrance (at the Upper Allen Sewer Plant).

4. The department of Safety should close roads as needed immediately and communicate to the VP for Operations. If the VP for Operations is not available, contact the Director of Safety and the Director of Facility Services.

5. Assure that all low lying buildings are being frequently checked for water.

6. Coordinate procedure with getting vehicles moved from Starry Field. If owners cannot be contacted because vehicles are not registered and if time permits, have the Safety supervisor contacted and authorize the plates to be run through Upper Allen for possible owners. If owners still are not able to be reached, the Safety supervisor on call can authorize a tow company to be called and the vehicles towed to a safe location.

   AAA 506-1907
   Coulson's 432-7408
   Zimmerman's 766-7656

7. Have pre-made signs that can be placed at cones, etc. indicating "Flooding Ahead - Stay Away".

8. Water grates should be checked prior to a potential storm, when there is a good indication that flooding could occur.

9. If after hours, keep the Safety supervisor on call notified of current conditions and preventative measures taken.

10. Coordinate the moving of Fleet vehicles if they are parked in a location that is easily flooded. A key to the fleet lock boxes is located in the lock box at Greenbriar.

11. Follow the "call in" procedure for flood emergencies. (See Attachment A)
"Note - The signed copy of this procedure is filed in the Facility Service Department. By signing
this policy you have agreed to enforce the contents, share with your staff and adhere to
standards".

ApprovedReviewedRevised
Kathryne G. Shafer, VP for Operations
