

THE CORRECT WAY TO RECYCLE CANS & BOTTLES

Messiah currently accepts:

- Aluminum
- Bi-metal
- Glass (clear, green, brown)
- Plastic (#1-#7)

All containers should be emptied and rinsed thoroughly, removing any drink or food contamination.

Waxed containers, such as orange juice boxes or milk cartons, are not recyclable and should be thrown in the trash.

Messiah College currently commingles plastic bottles, glass containers and cans. This means that all containers can be put into the same recycling container together and do not need to be sorted. Do **not** mix with garbage, paper or cardboard. Students in apartments should be using clear or white plastic bags only and tying them shut prior to placing into the recycle toppers. Do not put them in loose or use black trash bags. If you need clear bags, contact your apartment ARD.

If everyone will take the time to recycle, and to recycle the correct way, Messiah College can truly become a much greener campus thus becoming a better steward of what God has entrusted to us all, the Earth on which we live.

Please contact Wes Bower, Recycling and Waste Coordinator, or Hilary Kreider, Environmental Health and Safety Manager, if you have any questions.
