

# Nursing Health Form Information

---

This file includes information regarding the nursing health forms and requirements for clinical placements. Completion of these forms is required to progress into Nursing clinical courses.

A clinical information meeting will be held in April yearly for students beginning clinical experiences in NURS 210 & NURS 211 the following spring semester. Students transferring after the meeting or progressing directly into fall junior clinical courses (NURS 310 & NURS 311) will receive an email with specific information about the requirements.

All nursing students will be added to the Nursing Canvas site, which is the best source of clinical information. Also, the clinical coordinator is available to help students meet these requirements.

Please contact me with any questions or concerns after reviewing the information.

I confirm that I have received the influenza vaccine on (date): \_\_\_\_\_

I am unable to receive the influenza vaccination due the following reason cited by the CDC (<http://www.cdc.gov/flu/index.htm> ). Please circle reason:

- Have had a severe reaction to an influenza vaccination.
- Developed Guillain-Barre Syndromé (GBS) within 6 weeks of getting an influenza vaccine.
