

## Can a Scientist Believe in Miracles?

A free lecture sponsored by The Central Pennsylvania Forum for Religion and Science, the Messiah College Honors Program, and College Ministries

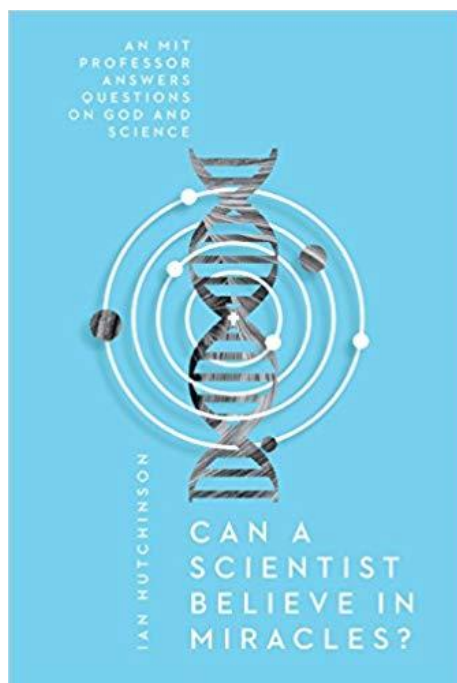

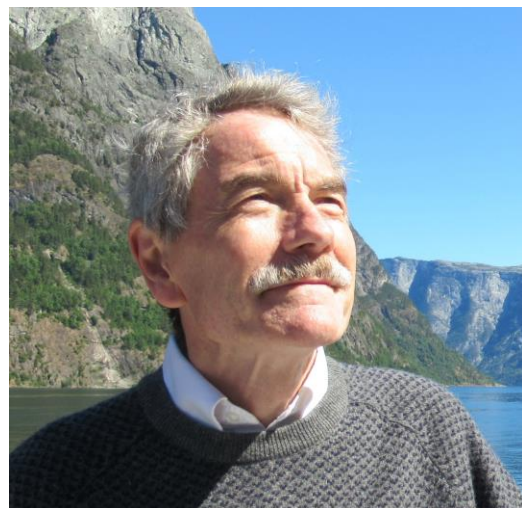

**Featured speaker: Ian Hutchinson, Professor of Nuclear Science and Engineering at the Massachusetts Institute of Technology**

Christianity can't be true if science disproves the possibility of a miracle such as the Resurrection. Does science really do this? For an adequate answer, we need to understand what science is and what a miracle is. A thoughtful examination of these two topics debunks the common claims of the skeptics.

**Tuesday, 5 November 2019, at 7:00 pm.**

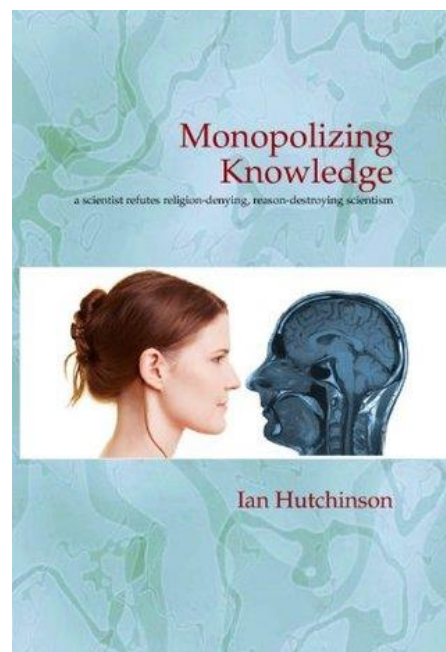

**Location: Hostetter Chapel Sanctuary, Messiah College, Mechanicsburg, PA. Directions and a campus map are at**

Ian Hutchinson is Professor of Nuclear Science and Engineering at the Massachusetts Institute of Technology (MIT). An international expert on the physics of plasmas, his research underlies the effort to generate practical energy from fusion reactions, the power source of the stars. He is also a widely respected speaker and author on the relationship between science and Christianity. His book, *Monopolizing Knowledge*, debunks the error of “scientism,” the belief that science is the only credible source of real knowledge. His latest book, *Can a Scientist Believe in Miracles?* tackles hundreds of

the varied and tough questions that students have asked him at his public presentations.

The Central Pennsylvania Forum for Religion and Science is based at Messiah College. For details about all Forum events, please visit <http://www.messiah.edu/godandscience/> or contact Dr. Ted Davis ([tdavis@messiah.edu](mailto:tdavis@messiah.edu)), 717-766-2511, ext 6840.
