Overall this looks fine in terms of the basic reporting. Note that there's a desire to see how faculty are reflecting in their conversations on student learning and not just get the numbers of students passed-- in other words some qualitative reflection on student learning that can take place even if basic student performance meets the numerical standard. In one item it looks like to me that you did not meet the target but didn't actually formulate an action step, possibly because it was close. I'm not sure.
