### Stay Calm and Ride the Ups and Downs of the Market

The coronavirus outbreak has caused tremendous volatility in the stock market recently. This is a rapidly evolving situation and as more and more information becomes available, The Standard expects continued market volatility, both negative and positive, during the next few weeks.

In order to help you understand the nature of Market Volatility, The Standard has provided the attached information.

In addition, many of you may have questions about your retirement account and our partners at Capital View Wealth Management want to remind you that the group at Capital View Wealth Management is available to help you with your questions and concerns. While the members of Capital View Wealth are working remotely to do their part of maintaining safety, they are still available via email or phone conversations for you.
