

Daily Crime and Fire Log

The Department of Safety makes the Daily Crime and Fire Log for the most recent 60-day period open to public inspection during normal business hours (8:00 AM to 5:00 PM, Monday through Friday) with the exception of campus holidays/closings. The Daily Crime and Fire Logs can be inspected at the Dispatch Office, located in the Eisenhower Campus Center, 500 University Avenue, Mechanicsburg, PA 17055. Any portion of these crime and fire logs that is older than 60 days are made available for public inspection within two business days of a request. To request archived Logs, contact the Director of Safety at 717-691-6005.

The information in the Daily Crime and Fire Log typically includes the date and time the crime was reported, the date and time the crime occurred, the nature of the crime, the general location of the crime, and the disposition of the complaint. All confirmed fires occurring within, or on, any on-campus residential facilities will also be included in the log. Names of involved persons are not listed on the Daily Crime and Fire log.

Unless the disclosure is prohibited by law or would jeopardize the confidentiality of the victim, newly reported crimes/incidents within the University's Clery geography and updated information regarding previously-reported crimes are entered onto the Daily Crime and Fire Log within two business days of when a report is made to the Department of Safety. It is important to note that the Department of Safety has no jurisdiction outside of its identified Clery geography.

According to Federal Law, the Department of Safety has authority to withhold information from its Daily Crime and Fire Log only if there is clear and convincing evidence that the release of such information is: (1) Prohibited by law, (2) Jeopardizing to the confidentiality of the victim, (3) Jeopardizing to an ongoing criminal investigation or the safety of an individual, (4) A risk to cause a suspect to flee or evade detection, or (5) At risk to result in the destruction of evidence. Once the adverse effect is no longer likely to occur, the Department of Safety will disclose any withheld information.
